ScaleGrid

A solution for MSPs that will add to your bottom line

Transforming Database Management with Scalable, Secure Solutions

High-Performance DBaaS Solution for Service Providers

ScaleGrid provides a robust Database-as-a-Service (DBaaS) solution that supports PostgreSQL, Redi, MySQL and MongoDB.

It offers comprehensive database management capabilities, enabling MSPs to deliver high-performance and scalable database services to their customers

Zadara delivers enterprise-grade compute, networking, and storage services designed to support the most demanding workloads. By integrating with ScaleGrid, Zadara enhances the overall solution, providing MSPs with a powerful infrastructure platform.

A combined offering to help you slay your competition!

Automated Backup & Recovery

Automates the process of backing up database instances in full backups – all databases, users and settings.

Comprehensive Security Features

Built-in encryption, automated backups, and advanced access controls

High Availability and Disaster Recovery

Ensures uninterrupted access to essential data and services by providing HA for databases. It includes real-time data replication, load balancing and automatic failover.

Advanced Monitoring and Alerts

Each cluster has its own monitoring console to analyze the performance, usage, and availability.

JOINT VALUE PROPOSITION

ScaleGrid and Zadara combined solution offers the most robust and profitable way to deliver your managed solutions to customers and create incredible long-term value.

ScaleGrid DBaaS running on Zadara IaaS delivers:

HIGH PERFORMANCE

High availability, scaling, and real-time monitoring.

Delivers reliable and high-performance database services, ensuring optimal user experiences

COST-EFFECTIVE AWS ALTERNATIVES

Offer your customers a high-performance DBaaS solution that significantly reduces infrastructure costs compared to AWS. Address the most common pain points of RDS dependencies, providing a seamless transition and optimized performance.

ENHANCED PROFIT MARGINS FOR MSP

Leverage the partnership to achieve attractive margins on DBaaS services. Increase your revenue by capturing new business

EXPERT SUPPORT AND SERVICE

Access a dedicated support team from both ScaleGrid and Zadara, ensuring you have the expertise needed to optimize performance and address any challenges quickly and effectively.

SEAMLESS INTEGRATION AND MIGRATION

Simplify the migration process for enterprises looking to move away from AWS. Our solution ensure minimal disruption and high compatibility, making it easy for your customers to switch

Supported Databases Deployment Options

- MySQL
- PostgreSQL
- Redis
- MongoDB
- On-premise
- Cloud
- Hybrid

Performance Metrics

- High availability
- Automated scaling
- Real-time monitoring
- Optimized resource utilization

Security Features

- Built-in encryption
- Automated backups
- Advanced access controls
- Compliance with industry standards

Key Advantages:

- Versatility in database support
- Flexibility in deployment options
- Robust security measures
- Reliable performance metrics
